

Blinkit Sales Analysis Portfolio Report

Prepared by Hathim Manaf

1. Executive Summary

This project analyzes Blinkit retail sales data to evaluate product performance, outlet segmentation, and sales trends using Power BI. The analysis identifies key revenue drivers across product categories, outlet types, and geographic tiers, demonstrating data analysis and visualization skills.

2. Business Requirement

Blinkit needs to understand which products, outlet types, and locations contribute the most to sales in order to optimize inventory planning, outlet strategy, and operational decisions.

3. Objective

To analyze sales data and identify high-performing products, outlet segments, and sales trends.

4. Tools Used

- Power BI
 - Excel (CSV files)
-

5. Dataset Overview

The dataset includes:

- Product attributes: Item Type, Fat Content
 - Outlet attributes: Outlet Size, Outlet Location Tier, Outlet Type, Establishment Year
 - Sales metrics: Total Sales, Item Count, Average Sales, Average Rating
-

6. Key Metrics

Metric	Value
Total Sales	\$1,201,682
Total Items Sold	8,523
Average Sales per Item	\$141
Average Rating	3.9

7. Sales Analysis

7.1 Sales by Product Category

Item Type	Total Sales (\$)
Fruits & Vegetables	178,124
Snack Foods	175,434
Household	135,977
Frozen Foods	118,559
Dairy	101,276
Canned	90,654
Baking Goods	82,754
Health & Hygiene	68,025
Meat	59,448
Soft Drinks	58,920
Breads	35,358
Hard Drinks	29,515
Others	22,478
Starchy Foods	21,850
Breakfast	15,594
Seafood	9,071

7.2 Sales by Fat Content

Fat Content	Total Sales (\$)
Low Fat	776,320
Regular	425,362

7.3 Sales by Outlet Size

Outlet Size	Total Sales (\$)
Medium	507,896
Small	444,794
High	248,992

7.4 Sales by Outlet Location Tier

Location Tier	Total Sales (\$)
Tier 3	472,130
Tier 2	393,150
Tier 1	336,400

7.5 Sales by Outlet Type

Outlet Type	Total Sales (\$)	Items Sold	Avg Sales	Avg Rating
Supermarket Type1	787,550	5,577	141	3.9
Grocery Store	151,939	1,083	140	3.9
Supermarket Type2	131,478	928	142	3.9
Supermarket Type3	130,715	935	140	3.9

7.6 Sales Trend by Establishment Year

Year	Total Sales (\$)
2012	78,000
2014	131,000
2016	205,000
2018	131,000
2020	129,000
2022	130,000

8. Key Insights

- Fruits & Vegetables and Snack Foods are the highest revenue-generating categories.
 - Low-fat products contribute the majority of total sales.
 - Medium-sized outlets generate the highest revenue among outlet sizes.
 - Tier 3 locations outperform Tier 1 and Tier 2 in total sales.
 - Supermarket Type1 outlets dominate both revenue and item volume.
 - Sales peaked in 2016 and declined after 2018.
-

9. Recommendations

- Prioritize inventory for high-performing categories such as Fruits & Vegetables and Snack Foods.
 - Expand and optimize medium-sized outlets, as they generate the highest revenue.
 - Target Tier 3 locations for future expansion due to strong sales performance.
 - Strengthen Supermarket Type1 outlets, which contribute the majority of sales volume.
-

10. Conclusion

This project demonstrates data cleaning, aggregation, visualization, and insight generation using retail sales data in Power BI. The analysis highlights category performance, outlet segmentation, and temporal sales trends to support data-driven decision-making.

11. Limitations

- Dataset is simulated and not real Blinkit operational data.
- No customer demographic or profit margin information available.
- No real-time operational metrics such as delivery time or churn.
